A negative PCR or antigen test for registration/package pickup of the race week is good for the entire period of racing. The testing timeframe depends on when the athlete will register or pickup their race number for the race week.

You may use the testing provider of your choice within the window above. Please ensure results will be returned in time. As COVID case loads have increased so has testing, please ensure you have an appointment before you get to PA and ensure that the testing facility will in fact have tests available.

The following are local locations that provide testing, it is still up to the rider/riders, support staff/family to ensure that results will be available at packet pickup.
